12PAK50

All GS Tooling holders and components are ground to perfection.

To make extremely precise tooling, we start with prebalanced holders and components and invest the time to grind all surfaces that will be in contact with the machine to a fine finish. This offers a tighter connectivity and grip in all mated areas vs turned holders, increasing tolerances throughout.

Our Collet Chucks have a runout accuracy of 0.0001" and taper and collet cavity have an accuracy of AT2 or better.

Explore more GS Tooling features and offerings in our Collet Holder Tooling Systems Mini-Catalogue.

We reserve the right to make pricing changes or impose purchase restrictions at any time, and accept no liabilities for mistakes and printing errors. All taxes & freight extra. While supplies last.
