\$799.00**

With steel machinable jaws.

For 5-axis machining applications and machining centers with a smaller work envelope. Jaws can be changed in seconds, greatly improving your efficiency and reducing set-up time.

Thru-body mounting eliminates need for clamping outside the body. Drainage slots evacuate coolant and chips, keeping the segment screw free of debris.

Maximize workholding by using Mitee-Bite® TalonGrip™ and VersaGrip™ clamps with your SnapLock Jaws. Perform aggressive machining operations while clamping on as little as .060" of an inch.

FEATURES:

- Vise body and segment assembly manufactured from 4140 hardened steel for maximum rigidity, accuracy and clamping pressure.
- Machinable jaws allow maximum part contact ensuring a rigid, accurate workholding fixture.
- Vise accepts Toolex® SnapLock Jaws for maximum flexibility and reduced set-up time.
- Tool kit included (vise handle, pry wrench and hex key).
- Solid end construction eliminates jaw lift on fixed jaw end.
- Repeatability within ± .0005".
